

Educational Solutions

Montessori School of Allen Park, Michigan

The Challenge:

A burgeoning student population, limited building funds, and a narrow window of time created a management predicament: find an affordable way to house all students in one location, or split classes into two geographically separated campuses. School officials were also challenged to incorporate a design that included the architectural features of the existing facility.

The McDonald Modular Creative Solution:

We created an attractive, efficient, factory-built 6,528 square foot structure, which beautifully compliments the original building. The modular structure consists of eight 12' x 64' sections that were crane set into place and dried-in within one working day.

The Results:

Today, Montessori School of Allen Park students and staff compose a vibrant educational community that learns together on one campus.

Thanks to our modular educational specialist, the customer benefited from the speed of modular construction at a fraction of the cost.

Features:

- Spacious Classrooms
- Expansive Multipurpose Room
- Easily Accessible ADA Restrooms
- Welcoming Reception Area
- Convenient and Comfortable Rooftop HVAC Unit
- Energy Saving Double Door Air Lock
