

Educational Solutions

Birmingham Schools, Birmingham, Michigan

The Challenge:

An affluent community with high expectations of its public school district facilities, required 12,000 square feet of education space while the permanent building was demolished for reconstruction.

The McDonald Modular Creative Solution:

McDonald Modular Solutions new Education Flex is an innovative design featuring large classrooms with easy flow patterns through an 8' wide corridor. Students stay safe and comfortable going from room to room and no longer need to venture outside when moving between temporary classroom units. Simply tell us how many classrooms you need and we will deliver and install the required modules to meet your requirements.

Features:

- McDonald Modular Solutions Education Flex buildings are engineered and constructed to meet all applicable state requirements.
- Education Flex buildings feature programmable thermostats and high R value insulation packages providing the students and faculty a comfortable environment and the schools district and energy efficient solution.
- Spacious classrooms, high ceilings, and large insulated windows offer students an open and bright learning environment.
- In addition to ADA boys and girls lavatories, the available restroom modules offer separate faculty restrooms and janitor closets for a convenient yet durable solution.
